DETAILED ACTION

1. Applicant's Amendment filed 09/14/2005 has been reviewed and placed of record in the file.

Allowable Subject Matter

2. Claims 1-17 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a hybrid substrate with all exclusive limitations as recited in claims 1 and 8, comprising: a first region having a lower semiconductor layer with a first crystallographic orientation, an upper semiconductor layer with a second crystallographic orientation which is different from the first crystallographic orientation, and a bonding interface separating said first and second semiconductor layers; and a second region substantially coplanar with said first region; said upper semiconductor layer having a thickness from about 200 nm to about 2 μ m and said bonding interface having an oxide thickness of about 10 nm or greater; said second region being absent of said bonding interface; and either: said second region having an upper surface of said first crystallographic orientation and comprising said lower semiconductor layer and an epitaxial semiconductor layer; or: said first and second regions being device regions, having different crystallographic orientations, and being separated by a device isolation region.
